#D89B3C

Woodland Sage

#7A8B5A

Linen Cream

#FBF3E7

5 Quick Coloring Tips

1

Start with your lightest colors first, then layer darker shades on top for shadow and depth.

2

The thick bold outlines in this book are perfect for blending — try two shades of the same color inside one shape.

3

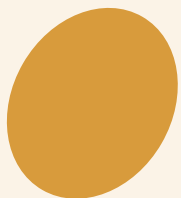

Testing a new marker on scrap paper first helps you catch bleed-through before it reaches the page.

4

Leave a few small spots uncolored — a little untouched white adds a nice pop of light to any scene.

5

There's no right palette. Pick the colors that make you happy, not just the ones that match the reference.

Thank You, Truly

We hope these five pages sparked a few new color combinations for your copy of Cozy Autumn Woodland Friends. This little guide is simply our way of saying thank you for being here.

If this book has been part of your cozy season, a review helps other colorists find it. We read every one, and we're grateful for each word.
